

May 22, 1963

Dr. L. L. Cavalli-Sforza  
Istituto de Genetica  
Via Sant 'Epifanio, 14  
Pavia, Italy

Dear Luca:

In order to put in effect what I had indicated earlier, mainly about putting Howard Cann on our training grant, he should fill out the following forms which should be familiar to him and let me know the amount of his present stipend from the NSF. The appointment will be made effective June 30, 1963, for one year, in order to use funds presently available on this year's budget. He should make the necessary arrangements to prevent overlap with his present fellowship.

Apart from the question of the research grant in pediatric and genetic epidemiology, have you thought of applying for a training grant in human genetics from the NIH? There are several institutions outside the States which have done this, for example, Boork in Uppsala and Ohkura in Tokyo, and I think it would be very valuable indeed from all standpoints if you could have a similar opportunity in Pavia. I think you can get more information about this from the new NIH European office in Geneva.

Yours sincerely,

Joshua Lederberg
